

Colton Keiser

IT Audit Consultant // Python Developer

Overview

Recent Information Sciences graduate, currently working as an IT Audit Consultant in St. Louis. Where I collaborate with clients to assess and improve the performance, compliance, and reliability of their IT systems.

Additionally, I serve on my firm's internal development team, where I design and build tools and applications for clients and internal use. I specialize in Python development and have experience with additional programming languages and frameworks, many of which are demonstrated in the projects on my [portfolio website](#).

Experience

IT Audit Consultant // Python Backend Developer, Protiviti | 2024-Present

- Perform client-facing IT audits, evaluating compliance and effectiveness of information systems and testing ITGC controls.
- Contribute to the internal programming team as a back-end developer, creating custom tools, applications, and process accelerators.

UIUC iSchool Advisor, UIUC iSchool | 2023-2024

- Provided tutoring for students in Information and Data Science programs. In Python and SQL related courses.
- Managed and updated the iSchool SharePoint website

Assistant Public Defender, Montgomery Courthouse | 2021

- Oversaw the management and updating of client records inside our internal database.
